

MULTIFUNCTION THERAPY WATCH

Battery capacity
long battery life cannot
be used while charging

Key adjustment
long press the switch
short press to pause

2 Modes
Mode A: Simultaneous treatment
of watch and output device
Mode B: Only output device

Time
(15/30/45/60 min)

Power
4 gear power adjustment

INTRODUCTION TO LASER ACUPUNCTURE

New watch style, specially designed for middle-aged and elderly people, used to relieve cardiocascular and cerebrovascular diseases such as hypertension,hyperlipidemia, hyperglycemia,hyperviscosity, coronary heart disease,etc. The cloud cells of the whole body will circulate through the wrist,and by irradiating the acupoints here,the blood circulation and metabolism can be accelerated.

COMPARISON BEFORE AND AFTER USE

Different from medicine and surgical treatment, laser physiotherapy has no chemical components and risk of sequelae. It is a course of treatment and needs to be used consistently. Generally, the symptoms are twice a day, one course of treatment every two weeks, and 4 courses of continuous use will gradually restore the effect.

BEFORE THERAPY

(There is a lot of garbage in the blood vessels, causing blockages and causing a series of diseases)

AFTER THERAPY

(Gradually eliminate the congested garbage in the blood vessels through phototherapy, and gradually discharge through circulation)

BEFORE DETECTION

AFTER DETECTION

PRINCIPLES OF WATCH THERAPY

Absorption of a large number of photons through the radial artery

Laser photons boost blood vessel circulation throughout the body

Expel atherosclerotic waste from blood vessels

TWO MODE OPTIONS

Mode A

Watch & Nasal Head
Simultaneous dredging of large
arteries and brain blood vessels

Mode B

Watch treatment only
Unclog the large arteries and promote
blood circulation throughout the body
